SKYLAN

produces speaker-stands and amplifier-bases in Calgary, Alberta/ Canada since 1985. The unique material mix out of polymer extrusion und MDF make SKYLAN-stands extremely light and almost non-resonant.

Due to their construction SKYLAN-stands can be filled with a wide range of different materials.

This enables a tonal optimization and an easy adjustment to various loudspeaker-concepts or local requirements with very less effort.

All these features make SKYLAN-stands an ideal addition to almost every monitor loudspeaker!

Skylan-stands are recommended by Harbeth !

general data:

- bottom-plate in 2,5 cm
- top-plate in 2,5 cm
- 6 mm thread for adjustable steel points or adjustable soft feet
- posts made of Polymer Extrusion, mass loading

included in the delivery:

- adjustable 6 mm spikes
- adjustable soft feet for parquetfloor
- high friction Neopren de-coupling pads
- funnel and cup for easy filling
- 11 mm wrench

SKYLAN-stands

are working perfect with many different speaker brands and are often recommended by different manufacturers.
